Question 1: What is the primary purpose of an ISO 9001 audit?

A. To identify non-conformities in the QMS B. To verify compliance with ISO 9001 requirements C. To assess the effectiveness of the QMS D. All of the above Answer: D. All of the above Explanation: The primary purpose of an ISO 9001 audit is multifaceted. While verifying compliance (B) is fundamental, audits also aim to identify non-conformities (A) and assess the effectiveness of the QMS in achieving organizational goals (C). A comprehensive understanding acknowledges that audits serve to improve quality performance holistically.

Question 2: During an audit, you observe that a process is not meeting its specified requirements. What should be your immediate course of action?

A. Document the non-conformity and continue with the audit B. Stop the audit immediately and inform management C. Document the non-conformance, discuss it with the auditee, and include it in your report D. Ignore it if it does not seem significant Answer: C. Document the non-conformance, discuss it with the auditee, and include it in your report Explanation: The correct approach is to document the non-conformance accurately, communicate findings with the auditee for clarification or immediate corrective actions if

appropriate, and record the issue for inclusion in the audit report. Stopping the audit (B) is unnecessary unless it poses an immediate safety risk, and ignoring (D) violates audit professionalism.

Question 3: Which of the following is NOT a characteristic of effective audit evidence?
