Optimizing PDF file names for SEO

The file name of a PDF plays a significant role in search visibility. Descriptive, keyword-rich file names help search engines and users

understand the document before opening it. Instead of generic names, using clear and relevant terms related to Asia Pacific Mathematical Olympiad For Primary Schools improves both SEO and user trust.

Hyphens should be used to separate words in file names, as they are more search-engine-friendly. Avoid unnecessary numbers or symbols that add no context or value to the document's topic.

Title, metadata, and document properties

PDF metadata functions similarly to HTML meta tags. Title, author, subject, and keywords provide additional context to search engines. Setting a clear and relevant document title improves how Asia Pacific Mathematical Olympiad For Primary Schools appears in search results and browser tabs.

Many PDFs are published with empty or default metadata, missing an opportunity for optimization. Updating document properties ensures that search engines receive accurate information about the content and purpose of the PDF.

Using structured headings and readable text
