#### 1. Causes of Biodiversity Loss

Question: Which of the following is NOT a major cause of biodiversity loss?

- a) Habitat destruction
- b) Pollution
- c) Sustainable resource management
- d) Overexploitation

Correct Answer: c) Sustainable resource management

Explanation:

Sustainable resource management aims to use resources responsibly without depleting them, thus supporting conservation efforts. The other options—habitat destruction, pollution, overexploitation—are primary drivers of biodiversity decline.

Common Causes Include:

1. Deforestation for agriculture, urbanization
2. Pollution of air, water, and soil
3. Overhunting, overfishing
