Key Concepts and Modeling Elements in SysML

Understanding the fundamental modeling elements of SysML helps in creating accurate and meaningful system models.

Blocks

Blocks are the core building units in SysML, representing system components or concepts. They can be physical entities, software modules, or abstract elements.

Properties

Properties define attributes or parameters of blocks, such as size, weight, or performance metrics.

Ports and Flows

Ports specify points of interaction on blocks, and flows describe data, energy, or material exchanges between blocks via ports.

Associations
