Origins of Cinema

The Birth of Moving Pictures

The story of cinema begins in the late 19th century, during a period of rapid technological innovation. Inventors around the world sought to capture and reproduce motion images, leading to the creation of early devices that could simulate movement. The key developments include:

1. **Phenakistoscope (1832):** An optical illusion device that created the illusion of motion using spinning discs.
2. **Zoopraxiscope (1879):** Eadweard Muybridge's device projecting a sequence of images to suggest movement.

The Lumière Brothers and the Birth of Cinema

The true birth of cinema as a mass entertainment medium is often credited to the Lumière brothers, Auguste and Louis Lumière, who in 1895 developed the Cinématographe. This device was revolutionary because it combined camera, projector, and printer functions in one lightweight apparatus, making it portable and suitable for public screenings.
