## Examples of Level 5 Science Exercises with Solutions

### Example 1: Living Things and Their Habitats

Question: Name three features that help a fish survive in water. Solution: 1. Gills for breathing underwater 2. Streamlined body for swimming efficiently 3. Fins for steering and stability Explanation: Fish have gills that extract oxygen from water, which is essential for respiration. Their streamlined bodies reduce water resistance, aiding movement. Fins help control direction and balance. Recognizing these features helps students understand adaptations of aquatic animals.

### Example 2: Materials and Their Properties

Question: Describe two properties of plastic that make it suitable for making bottles. Solution: 1. Plastic is lightweight, making bottles easy to carry. 2. Plastic is waterproof, preventing liquids from leaking. Explanation: These properties—lightweight and waterproof—are critical for the practicality of plastic bottles. Understanding material properties enables students to identify appropriate uses for different materials.

### Example 3: Forces and Motion

Question: Explain what happens when you push a toy car across a smooth floor. Solution: When you push the toy car, it moves forward due to the force applied. Because the floor is smooth, there is less friction, so the car continues to move for a longer distance before stopping. Explanation: This illustrates Newton's first law of motion and the role of friction in stopping moving objects. Students learn how forces influence motion and how surface conditions affect movement.

## Strategies to Effectively Use Solved Exercises for Learning

### 1. Active Engagement

- Attempt First: Before looking at solutions, try to answer the questions on your own. - Compare and Reflect: After attempting, compare your answer with the solved solution to identify gaps.
