Early Start Denver Model curriculum checklist for young children with autism Understanding the unique educational needs of young children with autism is essential for fostering their development and ensuring they reach their full potential. The Early Start Denver Model (ESDM) is an evidence-based early intervention approach designed specifically for children aged 12 to 48 months with autism spectrum disorder (ASD). An integral part of implementing ESDM effectively is utilizing a comprehensive curriculum checklist that guides caregivers and educators in delivering targeted, developmentally appropriate activities. This article provides an in-depth overview of the ESDM curriculum checklist for young children with autism, highlighting its components, implementation strategies, and benefits.

What Is the Early Start Denver Model?

The Early Start Denver Model is a comprehensive early intervention approach that combines applied behavior analysis (ABA) principles with developmental and relationship-based strategies. Developed by Sally Rogers and Geraldine Dawson, ESDM emphasizes naturalistic teaching within play and everyday routines to promote social communication, cognitive skills, language development, and adaptive behaviors. Key features of ESDM include:

- Individualized assessment to tailor interventions to each child's unique strengths and challenges.
- Naturalistic teaching strategies embedded in typical daily activities.
- Focus on social motivation to enhance engagement and learning.
- Family involvement as active participants in intervention.

The Importance of a Curriculum Checklist in ESDM
